

M290v

Description

The M290 system is our mid-sized stage truss line that can be used for both small and large applications. The M290 aluminum truss comes in a "B" and "V" range, which are designed for both large and small applications. The "V" Range is for heavy duty use, while the "B" Range is for medium duty use. Both trussing systems offer excellent spanning and weight loading capabilities while providing a decorative touch!

Call or e-mail us today for more information or to request a quote.
